HIGHLIGHTS OF ACCOMPLISHMENTS

MEDICAL SERVICES

On its 36th year of service, the Philippine Heart Center received the Gold Award from Accreditation Canada International, elevating PHC's primary concern for safety and quality of care to the level of international best practices.

PHC also topped the Department of Health's campaign for "Ospital ng Bayan, Malinis, Mabango" as a Gold Awardee with the highest score of 99.6% among the government hospitals.

Such recognition affirm that the Philippine Heart Center has been performing on a par with (sometimes even better than) top cardio hospitals in the United States in terms of the number of heart surgeries and a low mortality rate for patients (40 years and older) for PTCA and CABG.

It likewise sends a message that at the PHC, affluent Filipinos, newly rich Overseas Filipino Workers (OFWs) as well as marginalized Filipinos with heart diseases can avail of the best possible world-class care.

In 2011, PHC patient census at the Emergency Room and Admitting Section continues to increase. The Outpatient clinics and other diagnostic centers teemed with patients daily for their clinical examinations, medical management and invasive procedures.

Rehabilitation programs were also availed of to help patients overcome their disabilities and return to a functional life.

	2010	2011
ADMITTING SECTION		
Total Admission	13,856	14,484
Pay	12,517	13,265
Service	1,339	1,219
Occupancy Rate*	78.55%	76.33%
* excluding ICU: Surgical & Recovery room
